auliaz.com

Senior Software Developer with 7+ years' experience building event-driven, production systems across retail and enterprise settings. Strong background in distributed messaging, .NET microservices on Azure and reactive component based UI architecture, with recent involvement piloting AI-assisted development practices within the engineering team. Comfortable working across the stack, from cloud infrastructure through to UI, in Agile teams.

Work Experience

Greggs PLC

Senior Software Developer

December 2025 - Present

- Led the migration of cloud-to-edge delivery partner integration from WebSocket relay and Service Bus to event-driven streaming (NATS), cutting missing-order incidents 95% and eliminating data loss during outages
- Built a sidecar service syncing SAP menu data to a local DB, decoupling KMS from cloud availability and removing offline failures from poor in-shop connectivity
- Integrated Seq, Prometheus, and LaunchDarkly for safe rollout and fast incident detection across cloud/edge
- Owned Azure infrastructure for production Website, KMS, and Kiosk deployments, supporting 2700+ stores

Web Developer

January 2024 - November 2025

- Introduced WireMock and Nginx reverse proxy into the Kiosk, enabling parallel frontend/backend development
- Introduced feature flagging, A/B testing and user behaviour analytics using LaunchDarkly and Google Analytics across the kiosk funnel and Kitchen app, enabling safe rollouts and funnel optimisation
- Built secure guest checkout and mobile update flows (.NET Azure microservices), cutting support queries 85%
- Supported production diagnostics with Seq Logging and Azure Synapse
- Improved website accessibility from 72% to 82%

Vi8e Interactive Pte Ltd

Web Developer

November 2021 - November 2022

- Built and shipped a cross-platform ERP SPA to App Store and Google Play in Singapore
- Added geolocation verification, biometric authentication, camera integration, and i18n support
- Delivered third-party API integrations using Axios and Fetch

Frontend Developer

April 2021 - October 2021

- Built a Vue.js/Quasar ERP application with price calculation, dashboards, and Cordova mobile deployment
- Developed a custom theme for the Cold Storage e-commerce website

Universitas Sumatera Utara

Full Stack Developer

January 2017 - April 2020

- Built monorepo thesis management, research project management, and finance allocation portals
- Collaborated cross-functionally to gather requirements and design systems
- Debugged and resolved defects across the stack

Education

MSc Data Science and Artificial Intelligence

Newcastle University (**Distinction**)

September 2022 - August 2023

BSc Information Technology

Universitas Sumatera Utara (**2:1**)

September 2014 - January 2020

Skills

- **Languages:** C#, Dart, JavaScript/TypeScript, SQL
- **Backend & Databases:** ASP.NET Core, Node.js, MongoDB, PostgreSQL, MySQL, Terraform
- **Frontend:** Flutter, Vue.js/Nuxt, React/Next.js, Tailwind, Three.js, GSAP
- **Messaging:** NATS, RabbitMQ, Kafka
- **Testing:** xUnit, Flutter Test, Vitest, Jest, Cypress
- **Cloud & Ops:** Azure (DevOps, Portal, Key Vault, AKS, Synapse), Docker, Kubernetes, Git, Linux, Nginx, Seq, Prometheus
- **Other / Additional:** LaunchDarkly, ONNX, Storyblok, Riverpod, OnePub
