auliaz.com

Senior Software Developer with 4+ years' experience building event-driven, production systems across retail and enterprise settings. Strong background in distributed messaging and .NET microservices on Azure, with recent involvement piloting AI-assisted development practices within the engineering team. Comfortable working across the stack, from cloud infrastructure through to UI, in Agile teams.

Work Experience

Greggs PLC

Senior Software Developer

December 2025 - Present

- Re-architected cloud-to-edge delivery partner integration from WebSocket relay and Service Bus to data streaming, eliminating missing-order incidents across Uber Eats, Just Eat, and Click & Collect platform
- Introduced a sidecar with an overnight cron job to sync SAP menu data to a local database, decoupling KMS from cloud availability and reducing offline scenarios caused by poor in-shop connectivity
- Built an ONNX machine learning recommendation service for kiosk add-ons to improve upsell relevance
- Selected to pilot agentic AI development workflows (Claude Code, MCP-connected to repo and ticket context) across plan-first implementation, code review, and PR analysis to explore engineering-wide adoption strategy
- Managed Azure infrastructure, supporting production Website, KMS and Kiosk deployments

Web Developer

January 2024 - November 2025

- Introduced WireMock for API mocking and Nginx as a reverse proxy into the Kiosk to enable parallel frontend/backend development
- Introduced feature flagging, A/B testing and user behaviour analytics using LaunchDarkly and Google Analytics across the kiosk funnel and Kitchen app to enable safe rollouts and funnel optimisation
- Developed secure web and mobile app guest checkout and mobile update flows in .NET Azure microservices, reducing support queries by 85%
- Supported production diagnostics with Seq and Azure Synapse
- Improved website accessibility from 72% to 82%

Vi8e Interactive Pte Ltd

Web Developer

November 2021 - November 2022

- Built and maintained a cross-platform SPA ERP application which is released on the App Store and Google Play in Singapore
- Added geolocation verification, biometric authentication, camera integration, and i18n support
- Delivered third-party API integrations using Axios and Fetch

Frontend Developer

April 2021 - October 2021

- Built a Vue.js/Quasar ERP application with price calculation, dashboards, and Cordova mobile deployment
- Developed a custom theme for the Cold Storage e-commerce website

Education

MSc Data Science and Artificial Intelligence

Newcastle University (**Distinction**)

September 2022 - August 2023

BSc Information Technology

Universitas Sumatera Utara (**2:1**)

September 2014 - January 2020

Skills

- **Languages:** Dart, C#, JavaScript/TypeScript, SQL
- **Frontend:** Flutter, Vue.js/Nuxt, React/Next.js, Tailwind, Three.js, GSAP
- **Backend & Databases:** ASP.NET Core, Node.js, MongoDB, PostgreSQL, MySQL, Terraform
- **Messaging:** NATS, RabbitMQ, Kafka
- **Testing:** xUnit, Flutter Test, Vitest, Jest, Cypress
- **Cloud & Ops:** Azure (DevOps, Portal, Key Vault, AKS, Synapse), Docker, Kubernetes, Git, Linux, Nginx, Seq, Prometheus
- **Other / Additional:** LaunchDarkly, ONNX, Storyblok, Riverpod, OnePub
